PROFESSIONAL SUMMARY

Java Backend Developer Fresher with strong foundation in Data Structures, Operating System concepts, and System Programming.
Hands-on experience in building scalable backend applications using **Spring Boot, REST APIs, Microservices, and Linux system interfaces** through multiple industry-oriented projects.
Passionate about designing performance-driven and secure software solutions.

TECHNICAL SKILLS

Languages: Java, C, C++, Python, JavaScript
Backend: Spring Boot, Hibernate (JPA), REST API, Microservices
Databases: MySQL, MongoDB, Oracle SQL
Systems & Tools: Linux (Ubuntu/CentOS), Git, IntelliJ, VS Code, Apache Tomcat
Core Concepts: Data Structures & Algorithms, OOP, OS Internals, System Programming, Computer Networks

PROJECT EXPERIENCE

EduTrack – Student Management Portal | Java, Spring Boot, MongoDB

- Developed RESTful backend services for batch and student data management.

Concurrent FTP Server | C, Socket Programming, Multithreading

- Built multi-client FTP server using POSIX threads and TCP communication.

Customised Virtual File System (CVFS) | C, OS Concepts

- Implemented custom shell commands for file operations.

File Packer & Unpacker (Encryption) | Java

- Developed secure file archiving tool with encryption and metadata handling.

Chat Messenger with Logging | Java, Networking

- Designed real-time messaging system with timestamp-based logging.

Process Memory Inspector | C, Linux Memory Management

- Analysed process virtual memory layout and visualised stack/heap/data segments.

EDUCATION

B.E / B.Tech (Computer Engineering / IT / CS)
Savitribai Phule Pune University | 2025 | CGPA: 8.25

HSC – Maharashtra Board | 2021 | 78%
SSC – Maharashtra Board | 2019 | 88%

STRENGTHS

✔ Strong problem-solving and analytical ability
✔ Active GitHub contributor with industry-level projects
✔ Quick learner with adaptability to new technologies
✔ Good understanding of backend architecture and system-level programming
